

Mark 6

Flexible Collision Repair System

CAR-O-LINER[®]
Your safety - our mission

Mark 6 - A flexible system that delivers solid results

Car-O-Liner's Mark 6™ is a mobile bench system with the added convenience of drive-on mounting. It's designed around the idea that the more flexible a collision repair system is, the more productive it will be. With a series of configurations to choose from, Mark 6 means flexibility in getting the combination of equipment best suited to your business. You can even build a system of your own using a combination of benches and accessories (all accessories are interchangeable). And you can update your Mark 6 system as your needs grow.

Features & Benefits

- Drive-on mounting for quick repairs
- Compatible with EVO systems 1, 2 & 3
- Compatible with Car-O-Tronic Electronic Measuring Systems
- Interchangeable accessories allow you to build the perfect system for your shop
- Flexible installation; fixed, mobile or pit mountings
- Secure, quality clamping with specific OEM options
- Powerful, universal repair system for cosmetic and structural repairs featuring a 10-ton draw aligner

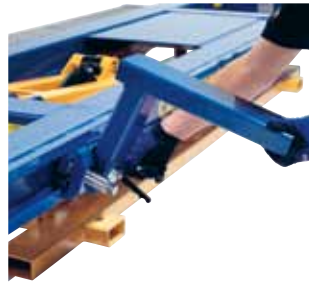

The D16 Draw Aligner gives 10 tons of pulling power

Approach ramps that easily can be converted into wheel stands, give excellent working conditions.

Powerful 10-ton Draw-Aligners pull from almost any angle, 360° around the vehicle.

Optional mounting arm (B310) clicks in and out for faster loading and unloading.

Optional chassis clamp (B110) offers faster setup and removal using just two bolts.

In-ground installation leaves frame level with floor allowing for easy drive-over and clean shop appearance.

Longer bench arms allow maximum work space between bench and underside of vehicle.

Technical Data

Mark 6	Standard & Classic
LIFTING pLATFORM	
Dimensions (LxW)	4060 x 900 (160 x34.5 in)
with draw aligner	
Min/Max Height	200 - 1360 mm (0.7-4.5ft)
Weight w/ Lift	680kgs/1496lbs
