Car-O-Tronic
Vision X3

Hardware			Benefits
Click in Batteries	●	●	No downtime, just click in a new charged battery
Plug in Slot/Measuring Adapters	●	●	Reduction of measuring errors
Wireless	●	●	No cables to run over, break or stumble on
Compatibility to other benches	●	●	Can be used on existing products. Less investment
High Measurement Point - HMP	●	●	Quick diagnosis of upper body measuring points
Built in Remote Control		●	Manage entire measuring process from a distance
Smart LED		●	Distance to measuring point automatically determined
Endless rotation		●	Continuous 360 degree movement
Software			
Complete Workorder Form	●	●	Saves documentation of all repaired objects
Complete Vehicle Index List	●	●	Structured vehicle search reference
Analyze mode of vehicle damage	●	●	Graphic representation to diagnose vehicle damage
Automatic Search Point (ASP)	●	●	Reduces measuring errors and incorrect selection of measuring points
Measuring during pulling (updates 3 times/sec)	●	●	Real time monitoring of repair work increase speed and quality
Absolute & Comparative Measuring Mode	●	●	Enhances diagnosis of points on the vehicle
Documentation as printouts	●	●	Comprehensive printouts as hardcopy documentation or handouts
Calculation sheet	●	●	Estimating database for documentation of calculations
Quick Guide, Instruction Manual	●	●	Easy to understand, reduces training and time
Backup	●	●	Back up database for quality and storage
Support through VisionWeb	●	●	No waiting time, best quality, decrease stop in the workflow
Upper Body Measuring Mode	●	●	Allows repair of upper body damages
Automatic Centering with diagnose	●	●	Quality, process control
Info Center	●	●	Central information knowledge base
Repair Info	●	●	Complete information on each Workorder, Export / Import Center
Online software and data updates	●	●	Always the latest data
Online support	●	●	Shorter waiting time for better work flow and lower costs
Automatic adjustment to screen resolution	●	●	Resolution sets automatically, user friendly
Import / export of Workorder	●	●	Standard format, easily interfaced to other systems and software
Holding and anchoring support (EVO 1, 2, 3)		●	Multimedia instructions and support during repair
Suspension Check Diagnose		●	Reduction of rework, saves time
Surface Damage Diagnose		●	Area calculation for repair estimation
VIN Decoding		●	Clear and easy identification of the vehicle
Point to Point - P2P Measuring		●	Fast diagnosis to save time
Animated setup/clamping		●	Easy to identify clamp locations quickly and accurately
handEye		●	iPhone/iPad Application making measuring easier than ever before
Vehicle information			
Photos of all measuring points	●	●	Easy and quick to find correct measuring points
Chassis drawings	●	●	Clearly identifies damage
Lower body data	●	●	Reference dimension data for over 13, 400 vehicles
Set-up information	●	●	Detailed clamping and set-up information
Upper body data, unibody	●	●	Reference dimensions necessary for quality repairs
Photos of vehicles	●	●	Quick visual identification of the vehicle
Holding and anchoring data (EVO 1, 2, 3)		●	Multimedia instructions and support during repair
Point to point data, unibody and fullframe		●	Fast diagnosis, saves time
VIN decoding		●	Clear identification of the vehicle
